Stroke and Neurodegenerative Disease

This lecture will discuss the real causes of such conditions as Stroke, Alzheimer's and Parkinson's disease as well as potential treatment options. Video documentation from leading research institutes will be shown. However, this information is NOT known by the vast majority of the public because the media will not cover such information simply due to the influence of the pharmaceutical industry. Videos of patients having undergone such treatments for these types of disorders will be shown along with what these patients experienced and the results they enjoyed after having been treated by Dr. Buttar and his staff. If you or a loved one is suffering or has ever suffered from a Stroke, Alzheimer's, Autism or any other type of neurological deficit or neurodegenerative condition, you can NOT miss this incredible documentation of not only what can be done, but what is being done daily not only to stop the progression of the disease but often reverse these conditions.

Cardiovascular Disease and Prevention

This lecture will discuss the causes of such conditions as heart attack, congestive heart failure and vascular disease including carotid disease and the cause of lower extremity ischemic pain. The various potential treatment options as well as preventive measures will be reviewed and presented. Much of the same information as presented during the Neurodegenerative Disease lecture will be given with special emphasis on the cardiovascular system and how the same pathogenesis effects the heart and vascular system. You will see some first hand results of the treatment success and see video documentation of what is possible. If you have any type of a cardiac condition, you must attend this lecture. It is guaranteed to open your eyes and let you see what the top medical journals in the US and the rest of the world are reporting, but what YOUR doctor may NOT be telling you. Don't be misinformed of the facts. **Empower yourself with knowledge and learn your true options.**

Cancer: Causes, Prevention and Treatment

This lecture will discuss the common causes of various types of cancer, as well as potential preventive measures that have been shown to contribute to living a life free of cancer. This information is well recognized by the Centers for Disease Control and has been published in well reputed medical journals. Although NOT openly discussed by the traditional medical hierarchy, this material is irrefutable. More and more people are now realizing and recognizing the flaws with the conventional treatment options. Make your own informed decision after being presented with the facts. **It's your life. Know Your Options.**

Chronic Heavy Metal Toxicity

This lecture will present the most important medical secret that has eluded most of the medical profession, yet is quite possibly one of the most important missing pieces to your health. A discussion regarding the source of heavy metal toxicity, as well as the implication between toxic metals and various chronic diseases will be presented. Data from leading medical journals will also be presented, supporting the correlation between heavy metal toxicity and chronic disease. Learn why heavy metal toxicity is often referred to as "The Hidden Killer" by those that are informed. Don't miss this great opportunity to learn one of the most important and life changing secrets in medicine that has eluded not only most doctors, but the vast majority of the public as well.
